

Powerpoint - Animating Slide Text

About animation

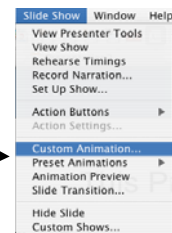

You can use animation effects to increase the visual impact of your slides, to build a bulleted list point by point, or simply to entertain your audience. Three types of animation effects are available for most text and objects:

1. Entrance effects, 2. Emphasis effects, and 3. Exit effects.

In Normal View, display the slide that contains the text or objects you wish to animate.

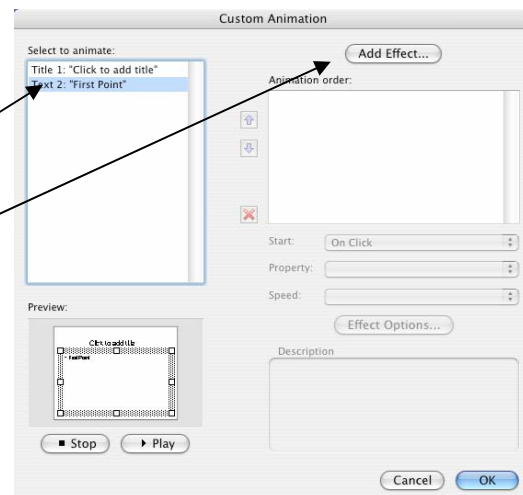

On the Slide Show menu, click **Custom Animation**.

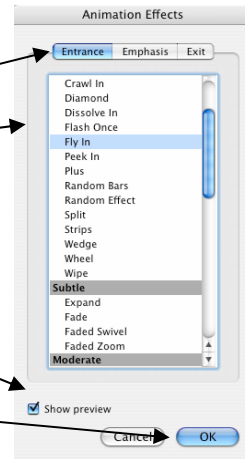

Within Custom Animation, under Select to animate:

1. Select the text or object you wish to animate
2. Click **Add Effect**.

Within Animation Effects:

1. Click the tab that represents the type of animation effect you want to add (Entrance, Emphasis, or Exit)
2. Click the animation effect you want to apply.
3. Select the **Show preview** check box to see a preview of the animation effect in the Custom Animation dialog box.
4. Click **OK**.

To preview animations, click **Play**.
